

REGIONAL INTEGRATION

MESSAGE FROM MIGUEL SEPULVEDA, GENERAL MANAGER OF THE ANTOFAGASTA RAILWAY COMPANY

As part of the Antofagasta plc Group, we are pleased to contribute to this Sustainability Report.

The Antofagasta Railway Company plc (FCAB) is a company in the Antofagasta Region with an extensive reach and a long history. Over the course of time, we have sought to promote regional development, offering not only a high-quality service in cargo transportation to various clients, but also taking into consideration the impact of our business on its surroundings.

One of the distinctive characteristics of our business is the high level of interaction and integration with other industrial activities in the region, such as the mining industry. More than 90% of our business activity is associated with mining,

creating synergies that offer benefits to various sectors.

Without a doubt the main focus of our management is on safety. This is why, in 2007, the FCAB implemented a Health and Occupational Safety System which has obtained OHSAS 18001 certification. We hope that in the coming years we can continue to improve our management of this area, effectively integrating the economic, environmental and social aspects of our business.

Miguel Sepúlveda
GENERAL MANAGER
